

Haines Traveller 185F

The new TF185 is a multi purpose fishing boat with the larger cockpit offering plenty of space for family, friends, eskies or other storage.

The cabin provides the shelter and security to protect your crew from the elements or for a rest on those busy days wetting the line.

Importantly, it carries on the great Haines traditions of seaworthiness, seakindliness (how it rides, the dryness, the comfort it engenders) and of course, the performance with a variety of engines.

Standard features include foam filled underfloor and lower topside sections, toilet, folding rear lounge, transom door, anchor winch compatible, large dash for those popular large screen electronics, and provision for an optional long range fuel tank. See below for list of standard features, and check the web site (www.thehainesgroup.com) to choose from the amazing list of custom options to truly personalize

Specifications

your Traveller.

This is Haines quality construction and workmanship at its best, and with the trademark stylish good looks and practicality this is a great fishing boat that will make lucky owners the envy of the waterways.

F&B is planning to formally test the T-185F early in the new year, but we're committed to testing the Haines Signature 602F first - that test is scheduled in the next - January 2010 - issue.
